

'Baker's Batik' T-Shirt

You will need:

Flour
Water
Cold water clothes dye
Spray bottle
Empty washing up liquid bottle
Plain white T-shirt
Cardboard

Steps:

1. Put one cup of flour into a jug, add a small amount of water and mix to make a paste.
2. Put a piece of cardboard inside the t-shirt and mark your design in pencil.
3. After putting the paste into the (empty!) washing up liquid bottle, start to follow the design (making a better job of it than Iwan!).
4. Leave it to dry and harden overnight.
5. Pour the dye into the spray bottle and spray the t-shirt.
6. Once the dye has dried, carefully pull the dry flour paste away.
7. A finished 'Baker's Batik' T-shirt!
